Dear Steve:

We will be pleased to publish a special issue of *Physiology and Behavior* in honor of WoodsFest. The Guest Editors for this issue will be Gerry Smith and Doug Ramsay. Anyone who attends will be welcome to submit an article, preferably on a topic related to your influence or interests. Of course, all submitted manuscripts will undergo peer review with Gerry and Doug making the final decisions.

Doug and Gerry will be in contact with the speakers and other attendees at the festival about submitting manuscripts. We also hope to include a section in the issue for free communication to you, to provide a space for comments and personal messages, as well as for you to make a final comment or two if you like.

I look forward to this special issue, and this opportunity to recognize your contributions.

Sincerely,

Randall R. Sakai
Editor-in-Chief
Professor of Psychiatry
Director, Lab of Neuroendocrinology
