

How Do I fix bounced e-mails?

Classmates,

In order to ensure you receive important messages from our class web site, as well as messages sent directly to you from other Classmates, it's important you whitelist the email address noreply@classcreator.net (that's a .net, not a .com).

What is whitelisting? Whitelisting simply means you are telling your email program to accept all emails coming from our class web site and our Classmates. The technique for whitelisting varies by email program, but generally you will see the term "Whitelist", "Safe List", or "Safe Sender's List". This is where you want to be sure you have added the email address **noreply@classcreator.net**.

Class Creator, the system that helps us operate our class web site, uses the address noreply@classcreator.net when sending out email messages. Be assured that all emails sent through our site are valid — you will not receive spam email. Whitelisting noreply@classcreator.net is the single most important thing you can do to ensure you don't miss anything happening on our site or miss receiving your emails from your fellow Classmates.

Stop and take a moment to whitelist noreply@classcreator.net right now, and ensure you stay connected!
